

Narrative Vessel - Coils

You Must:

- Write or find a story that tells an easily followed plot.
- Create some sort of Vessel to represent your story on.
- Create your vessel using the coil building method.
- Sketch your outline (of your story) and etch it into the black slip on your vessel.
- Make your vessel a minimum of 6 inches tall

You May:

- Draw abstractly.
- Use another building method along with coils.
- Write or find a story – either one.
- Use any shape of a vessel.

Think:

- What are some ways to make your story clearer?
- What can you do to make your vessel stand out?
- What shape can you make your vessel in order to better tell your story?
