

## Henry Moore Plaster Sculpture

### Goal:

- To create an abstract sculpture using plaster and carving tools.

### You Must:

- Use 5 of the 9 elements of 3-D art.
- Paint your sculpture.
- Have a completely smooth and sanded surface, unless the texture is intentional.
- Have interest on all sides except the bottom.

### You May:

- Bring in your own paint.
- Letter or use sharpie to create words as a texture or pattern.
- Put your object on a pre-made plaster stand (so they don't have to sit flat).

### Think:

- How can you use the elements of 3-D art to your advantage?
- How can you make your project stand out?
