

## Abstract Figurine - Paper Clay

You Must:

- Make an abstract figure that is at least 18" tall or wide, but not more than 22" tall or wide.
- Use paper clay and at least 1 other combustible material.
- Make a Figure (something that is alive and can move on its own accord).
- Use a wire armature to support your figure.

You May:

- Use more than one additional material.
- Make animals or people.
- Create texture with materials not put in the clay.

Think:

- What are some ways to push the abstraction?
- What combustible materials can I use?
- How can utilize the naturally rough texture of the paper clay?
- What poses can I use that will make my figure stand out? NO STATIC POSES!!!!
